Dr. Geo. Engelmann

Dear Sir.

I have just-
looked over the catalogue of the
plants belonging to the late Dr.
Rugel, and I find only one species
of Isoetes given and that is I. lacustris
I find that Dr. R. has left a large
number of plants which he has
collected of late years in Texas, but-
they are not named, and I suppose
there is no chance of the species
you desired being amongst them.
In a former letter you asked me
where Dr Rugel was born, and I

had forgotten. I have since been
Mrs Rugel and she tells me Wirtemburg
was his birthplace.

We have not got been able to
make a sale of either Collections
of plants or shells. Thanks to
you for suggesting the Vanderbilt
University at Nashville. We have
written to them but have not got
received a reply. I still hope we
may find a purchaser.

Believe me dear Sir
Your truly
Mrs Geo. Andrews
